Adventures in Computer Science
(or how are these 3 years relevant to what everyone else is doing?)

Computer Science is an art. You end up getting a Bachelors degree in the Arts of it. In 45 minutes we will walk the different paths that CS has paved into (my) practice of information security. We will see how the different aspects of the science turn up in the daily work we deal with, and see what kinds of disciplines complement the practice of Information Security.

Iftach Amit, Security Expert

Iftach has over 15 years of experience in information security and brings a multidisciplinary approach to the practice.
