Following a brief introduction of cloud computing, we'll go over the underlying technology enabling today's public and private clouds. We will discuss the importance of storage in the cloud era, and review some of the challenges faced by users and sys-admins who make a transition to the cloud. We will also review some of the key service providers and products in the field.

Haim Ateya leads the quality assurance group in XtremIO at EMC. He is an IT professional and Linux expert. He specializes in SAN/NAS architectures, public/private clouds and virtualization technologies.

Previously he worked for Redhat, Microsoft and Radware.
