The world is undergoing rapid transformations fueled by technology. One of these changes happens in education, which is still operating mostly on traditional concepts and models. The talk will present some of the trends and technologies that disrupt the education world, and how Matific is using big data, cutting edge infrastructure, software and delivery models to transform how mathematics is taught and learned around the world.

Guy Vardi co-founded Matific in 2011, and serves as its CEO. Guy was a founding member at Oberon Media. He built casual games platforms for Microsoft, Yahoo, Comcast, EA, Orange, and more, Guy is a user experience specialist, a gamer and a maker, and lives with his family in New York. He is a graduate of IDC's computer science program.
