At this Tech Talk, Allon will talk about building mobile apps at Facebook and in particular how Facebook does this at scale, the challenges they face and how hundreds of engineers come together to ship the most popular apps on the App Sore faster than any other company in the world.

Allon is a Software Engineer on the Onavo team at Facebook, where he focuses on mobile apps and the backend that supports them. Allon has been doing mobile development for seven years and has worked on multiple platforms including J2ME, Blackberry, Android & iOS. Prior to joining Facebook, Allon worked as a software engineer in AT&T’s Mobility Group at their Israeli R&D center. Allon loves building software that delights and empowers people. He holds a degree in Computer Engineering from Tel Aviv University.
