Omer Zimmer, CEO Zohar Energy

The company provides infrastructure solutions for charging of electric vehicles in Israel and several countries in Central and Eastern Europe. The Company provides a comprehensive solution in terms of charging infrastructure for electric cars, command and control systems etc.

Ido Laufer, CEO Shamaim

Shamain is a business social community for electrical waste recycling within the community. The company operates collection and recycling centers in urban rehabilitation centers and employs exclusively rehabilitated people.

Ronny Segoly, CEO Ecoop

The Cooperative for Renewable Energy is a social business initiative founded in October 2009. The objective of the Cooperative is to promote projects in the field of renewable energy and energy efficiency in Israel.

Itamar Ronen, Business Development S.D.E

S.D.E. is a world leader in the planning, building and marketing of power stations, producing power from sea waves. SDE’s method consists of using sea wave motion to generate hydraulic pressure, which is then transformed into electricity.
